

Pre-Approved Lighting

When possible the photo shows the light fixture in one of the approved colors. All lights come in brown and/or black, some are in nickel. Pre-approved colors are noted. White glass (or acrylic) is preferred. White fixtures are prohibited.

If you don't see something here that you like, or if you would like an alternate color, please submit a request form to the AC. We're here to help.

The hyperlinks to web sites on these pages are for information only. If possible they reflect the current lowest prices that were available as of 2/15/2013.

The sites include:

lightingdirect.com;

1800lighting.com;

louielighting.com; wayfair.com, build.com; as well as

lightinguniverse.com. Almost everything can also be ordered at amazon.com. Security lighting is available at Home Depot and Lowes.

Use the manufacturer and item number to search for additional

web sites or to get the current lowest price. Be sure to include any options that you are choosing as each stock number may indicate those choices.

You can also order the fixtures from a local lighting store. Be sure to call first to see if your store carries these brands.

Security Lighting

The pre-approved location for security lighting on the front of the house is on the brown facia over the center of the garage door. If you would like to put a light in a different location, please submit a request form with a photo showing the proposed placement.

The security lighting shown here is not meant to replace the decorative lighting on the front of the house. The fixtures are all available from either Home Depot or Lowe's. If you don't find one that you like, please feel free to submit a form with your alternate choice.

All lights should be brown or black and should be mounted on the brown trim if possible.
